

Fixnetix Co-locates at Interxion's London and Paris Financial Hubs

London & Paris, 10th November 2009

Interxion, a leading European operator of carrier-neutral data centres, today announced an agreement with Fixnetix to house its platform at Interxion's City of London and Paris data centres. Customers co-locating at Interxion's facilities will now be able to connect to a wide range of European markets from a single location through Fixnetix's shared infrastructure, helping them to reduce operating costs significantly and also fine tune their trading strategies to address changing market conditions.

Interxion's data centres provide a highly secure physical location with advanced infrastructure for mission-critical applications. High-density power configurations from 5 kW up to 30 kW are available as standard, with industry-leading service levels and availability and 24/7 secure access to equipment. Fixnetix's direct ultra-low latency trading access and market data feed solutions have been designed to be fast, reliable and flexible, and feature best of breed feed handler technology, unparalleled high bandwidth provision and full redundancy throughout the entire delivery mechanism. Fixnetix feeds integrate easily into an organisation's existing architecture, or can be accessed in a dedicated environment such as Interxion's carrier-neutral data centres to deliver ultimate end-to-end performance.

"At Fixnetix we're committed to setting the performance standard, so we're delighted to extend our low latency market data and trading infrastructure into Interxion's Paris and City of London data centres" said Hugh Hughes, Fixnetix's Chief Executive Officer. "One of the key reasons for choosing Interxion was because of its strong existing community of market participants within its data centres. We believe that our powerful range of solutions can deliver real benefits for Interxion's growing number of high frequency trading firms, adding value for those organisations already attracted by Interxion's leading service level agreements and strategic data centre locations within close proximity to key liquidity venues."

"The Fixnetix agreement is further evidence of our continued focus on scaling the Interxion Financial Hubs in the City of London and Paris" said Anthony Foy, Group MD Interxion. "Our proximity to the most important liquidity markets, the ability to deliver high density power and superior connectivity to financial markets through organisations like Fixnetix makes a compelling proposition for capital markets participants to co-locate at these sites."

About Fixnetix

Founded in London in 2006, Fixnetix is a leading Managed Service Provider for the global financial community. Over the last eight years, Fixnetix has built a reputation as an award winning international technology vendor, supplying outsourced services for ultra-low latency trading, market data, hosting, infrastructure connectivity and risk management to prominent Investment Banks, Hedge Funds, Proprietary Trading Groups, Start Ups and Exchanges worldwide.
