

# Fixnetix and Equinix Sign Global Solution Partner Agreement

London & Hong Kong, November 13<sup>th</sup> 2013

Equinix Inc. the global interconnection and data centre company today announced that it has signed a worldwide Solution Partner Agreement with Fixnetix. The joint agreement will promote and extend the availability of Fixnetix's data feeds and trading connectivity solutions to Equinix's 800-strong global, multi-asset financial services customer ecosystem. To ensure worldwide reach and address growing demand from European and American market participants venturing into Asia Pacific markets, Fixnetix is extending its global footprint into Equinix International Business Exchange (IBXTM) data centres in Tokyo, Sydney, Hong Kong and Singapore. The agreement covers Fixnetix's full range of data feeds and trading connectivity solutions. Customers accessing this portfolio of award-winning services based on Equinix technical infrastructure can gain access to liquidity at the highest possible speeds with no buffering or loss of data and full redundancy.

The new Fixnetix infrastructure in Equinix Tokyo (TY3), Sydney (SY2), Hong Kong (HK1) and Singapore (SG1) International Business Exchange (IBX®) data centres – deployed as the first stage of the agreement – will provide sub-millisecond access feeds and trading connectivity solutions to over 10 local and 80+ global execution venues. The new locations add to what is already an extensive and highly interconnected Fixnetix infrastructure across Platform Equinix™, covering 12 key markets in EMEA and the U.S with existing deployments in Equinix's London, Frankfurt, Zurich, New York and Chicago data centres. Since Fixnetix first started working with Equinix in Frankfurt in 2007, the number of interconnections serving customers in Equinix facilities has grown dramatically to its current level of approximately 400. Equinix global IBX data centres provide a neutral meeting place for the world's electronic trading community, whilst controlling bandwidth costs, reducing CapEx and simplifying infrastructure. Equinix interconnects some 800+ trading venues, market data providers, networks and technology service providers within the world's largest multi-asset financial ecosystem.

"Fixnetix is pleased to strategically align with Equinix in Asia" said Hugh Hughes, CEO of Fixnetix. "Our trading customers are now able to access market data, get trading access as well as utilise our FPGA pre trade risk engine iX-eCute for risk control worldwide."

Stewart Orrell, Managing Director of Global Financial Services, Equinix added "The Fixnetix portfolio of services has proved exceptionally popular with the financial services community, and their phenomenal growth over the past several years has enriched our financial ecosystem by providing leading-edge managed services in the top financial markets. Our partner agreement recognizes this and expanding our relationship will provide greater reach and value for our customers."

## About Fixnetix

Founded in London in 2006, Fixnetix is a leading Managed Service Provider for the global financial community. Over the last eight years, Fixnetix has built a reputation as an award winning international technology vendor, supplying outsourced services for ultra-low latency trading, market data, hosting, infrastructure connectivity and risk management to prominent Investment Banks, Hedge Funds, Proprietary Trading Groups, Start Ups and Exchanges worldwide.
